The Cycle Storage Specialists

Velo-Box Locker

Dimensions in mm

Length 2000
Width 810
Height 1300

Overview

The Cycle-Works Velo-Box Locker is an innovative and adaptable storage solution that offers high security at an affordable price. Each locker can have a door at either end meaning 2 bikes can be stored securely. The locker is not only economical but extremely strong, using a monocoque technique that is more widely found in aircraft and automotive construction.

The innovative British design and construction also includes one of the strongest locking systems available on the market. The locker can be customised and Cycle-Works will work with you to design the best solution for your site. Two bikes can be installed into one unit with a door on both ends, a full size steel internal divider separates the two bikes and keeps each unit secure.

Features & Benefits

- Strong monocoque construction
- Easily fits all standard bikes
- Each locker can hold 1 or 2 bikes with an internal divider
- One of the strongest locking systems available

Velo-Box Locker

Locking Options

The standard locking option is users own padlock with master key override.

Other locking options are available

- High security stainless steel pop out t handle with high security cylinder.
- High security die cast pop out t handle with anti drill protection and high security cylinder.

Pop out T handle with high security cylinder.

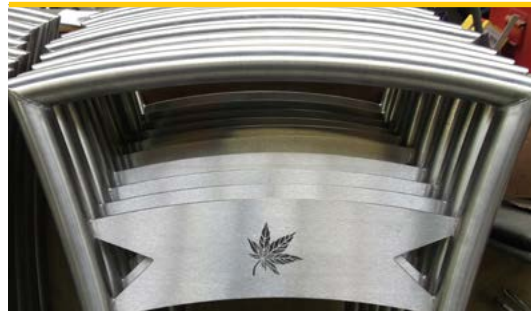

High Security T-handle inserts & master key cam lock

- All-new mechanism based on a revolutionary and unique asymmetrical warded key way.
- Seven stainless steel locking elements fasten the central core to the outer body.
- The internal components are machined from brass for excellent durability and reliability.
- Over 750,000 key combinations
- Further protection from drilling is provided by a second hardened roller inside the lock, which spins freely when a drill bit comes into contact with it.
- The Series 35 has no 'shear line', with its associated susceptibility to picking and bumping.
- Hardened steel anti-drill center post.

About Cycle-Works

Cycling is our passion. We believe that cycling is good for people, good for society and good for the environment. This belief underpins everything we do. We believe that the provision of quality facilities will increase the use and acceptance of the bicycle.

All our employees and associates cycle regularly in diverse disciplines such as commuting, touring and long distance audax rides. We are active in both local and national cycle campaigning.
