Padlock & master key

Overview

Our 3-tier folding bike lockers are specifically designed to comfortably accommodate smaller folding bikes, such as Bromptons. They provide enough space to store a helmet, lock and small bag. The internal compartments provide 600mm high x 320mm wide x 600mm deep of usable internal space and come pre assembled in columns of 3 lockers. The external size is 2100mm high x 400mm wide x 650mm deep. The doors are solid fronted as standard to increase security but can be perforated if required. The whole locker is fabricated from galvanised sheet steel and then powder coated in your choice of colour (most standard RAL colours are available).

The standard locking option is a single high security cam, this can be available with a master key option if required. Its also available as a padlock and master key over ride. This allows the user to supply their own padlock. We issue a set of master keys that allow management access to the lockers without having to interfere with the padlock.

Features & Benefits

- Strong monocoque construction.
- Pre galvanised steel construction.
- Designed and 'Made in Britain'.
- Designed to fit a Brompton folding bike.
- Room to store a helmet, lock and small bag.
- Users own padlock with master key override.
- Available in most standard RAL colours.
- No groundworks required.

The Cycle Storage Specialists

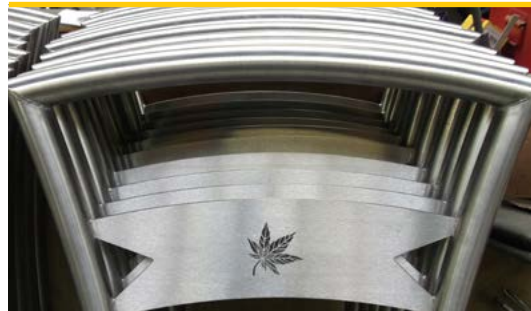

3-Tier Folding Bike Lockers

About Cycle-Works

Cycling is our passion. We believe that cycling is good for people, good for society and good for the environment. This belief underpins everything we do. We believe that the provision of quality facilities will increase the use and acceptance of the bicycle.

All our employees and associates cycle regularly in diverse disciplines such as commuting, touring and long distance audax rides. We are active in both local and national cycle campaigning.
