

BikeAway Heavy Duty Locker

Dimensions in mm

Width	680
Depth	1150
Height	1900 to 2000

Overview

The BikeAway Heavy Duty Locker is an high security version of the standard BikeAway locker for high crime areas. The locker is made from galvanised steel which stores the bike vertically. There is no metal-to-metal contact between the bike and locker and the bike is stored safely off the ground. Therefore, this locker is a popular option for schools, colleges and large organisations.

The cyclist uses their own padlock to lock the door. An override mechanism then allows the operator to obtain independent access to the locker when necessary, it is especially relevant for security-sensitive areas where spot-checks need to be carried out.

Features & Benefits

- Space efficient - small footprint.
- 2mm thick doors incorporating strengthening tie bars which provide an inner frame within the door.
- Easy-to-use and suitable for use in schools.
- 12 lockers fit into two standard car parking spaces.
- The legs can be adjusted to accommodate gradients.
- Coloured in RAL6005 (British Racing Green) or RAL5003 (Oxford Blue), other RAL colours are available for large quantities.
- Additional stainless steel lock guard making tampering with lock almost impossible.
- Passed the attack test for LPS 1175 as recognised by Secure by Design.
