

Clothes Lockers

Overview

Our helmet and clothes lockers can be supplied in a number of sizes and colours to meet your particular requirements. They range from full-size single lockers to a unit of 6 smaller compartments in one vertical column. They are made of galvanised and powder coated mild steel.

We have used the same high quality construction techniques we use on our durable and SoldSecure approved Velo-Safe and Velo-Box lockers to construct helmet and clothes lockers for outdoor use. These can have a range of locking options, with the standard being a padlock operation, with a master key over-ride for the Managers or Security services. They can be powder coated to match the adjoining cycle parking, as required.

Features & Benefits

- Strong monocoque construction.
- Mild / pre galvanised steel construction.
- Designed and 'Made in Britain'.
- Locks with either D-lock, cable lock or padlock.
- Comes with master override key - high security.
- Available in any standard RAL colour.
- No groundworks required.

Clothes Lockers

Dimensions

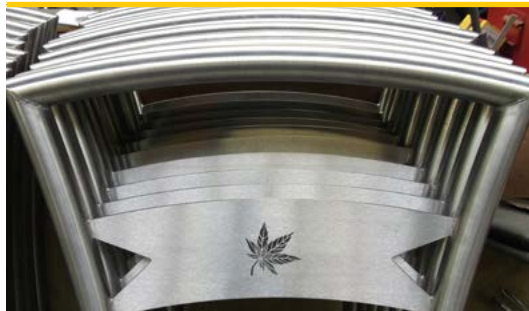

Each column is 1800mm high, 400mm wide and 450mm deep. The height of each compartment depends on how many tiers there are.

About Cycle-Works

Cycling is our passion. We believe that cycling is good for people, good for society and good for the environment. This belief underpins everything we do. We believe that the provision of quality facilities will increase the use and acceptance of the bicycle.

All our employees and associates cycle regularly in diverse disciplines such as commuting, touring and long distance audax rides. We are active in both local and national cycle campaigning.
