The Cycle Storage Specialists

Velo-Store

Full Length Lockable Door

The door pivots back into the unit and the weight is counter balanced by an industrial sprung mechanism.

This keeps the profile of the unit low and has no on going maintenance issues with gas struts.

The sprung mechanism aids opening and closing the door.

The door is locked off with a unique and secure internal dead system.

Full Length Door

Full Length Door

Half Length Door

Open Access

The Velo-Store is available with either a half door or no door option. Both of these offer greater weather protection and security than typical open 'Sheffield' types racks, but without the need to issue keys to users.

The half door model is ideal for shopping centres, swimming pools, leisure centres, railway stations, etc. The 'no door' model has slightly less weather protection, but the roof still covers most of the bike, and as far back as the saddle. It has the advantage of no moving parts.

Half Length Door

Velo-Store

Internal Security

The multi-bike Velo-Store is supplied with the Cycle-Works high security HD rack inside. This high-low system offers better security than a typical Sheffield stand as it captures the front wheel, and has a pivoting locking bar that allows the frame and wheels to be locked in many different places.

The HD rack can be powder coated in the same colour as the unit, or in a contrasting colour.

"The residents are very pleased as they are now able to put their bikes in the Velo-Store rather than having to have them in their flats and carry them up and down the stairs."

Tristar Homes Ltd, Chris Peters - Patch Manager

Colour Options

All the panels on a Velo-Store - door, roof, back, upper and lower side panels and frame work - can be powder coated in any standard RAL colour. If you have specific brand colours then we can colour match them and find a combination that best suites your site and environment.

This not only adds to the life of the Velo-Store by protecting the metal but also means it is able to seamlessly blend into any location. The side panels can also be laser cut with your logo or a graphic.

The Cycle Storage Specialists

Velo-Store

Grouping

The unique, flexible shape and modular design of the Velo-Store means that it can fit into many different locations, and can be as long as required.

Some of the units can be open access, while others can have the optional locking doors for more security.

Two 4 bike units, to park 8 bikes, comfortably fits across a standard car park bay.

Unit Sizes

Velo-Store Unit Sizes

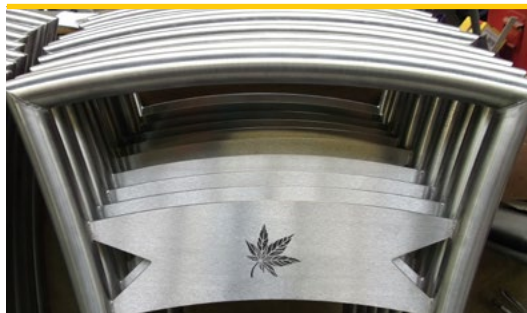

Bikes parked	Width (mm)	Depth (mm)	Height (mm)
1	781	2154	1534
2	1181	2154	1534
3	1581	2154	1534
4	1981	2154	1534

About Cycle-Works

Cycling is our passion. We believe that cycling is good for people, good for society and good for the environment. This belief underpins everything we do. We believe that the provision of quality facilities will increase the use and acceptance of the bicycle.

All our employees and associates cycle regularly in diverse disciplines such as commuting, touring and long distance audax rides. We are active in both local and national cycle campaigning.
