Josta Berlin Shelter & Compound

Shelter Overview

The Josta Berlin Shelter is a versatile and modern shelter that can be manufactured to any required size. It can be used to cover all our standard bicycle racks and the high capacity Josta 2-tier rack that requires a 2.6m clearance height. This shelter complements modern architecture in particular but blends in well in all surroundings.

The elegant apex roof is fabricated from high strength security glass and can be installed with internal flood lighting giving excellent visibility throughout the year. The shelter can also be finished off with either a high security mesh or timber panels on the back and sides to add weather protection and increased security.

Features & Benefits

- Elegant apex roof
- Modular construction
- Can be any height
- Ideal for our high capacity Josta 2-tier racks
- All shelters can be custom built to any size
- Embedded into a reinforced concrete base
- Galvanised Mild Steel framework
- Can be powder coated in any standard RAL colour
- High strength security glass roof
- Panels can be mesh or timber

Josta Berlin Shelter & Compound

Compound Overview

The Josta Berlin Compound is a versatile and stylish high security compound that can be manufactured to any required size. It can be used to cover all our standard bicycle racks and the high capacity Josta 2-tier rack that requires a 2.6m clearance height. This shelter complements modern architecture in particular but blends in well in all surroundings. The elegant apex roof is fabricated from high strength security glass and can be installed with internal flood lighting giving excellent visibility throughout the year. Rows of the compound can be as long as required. The standard width is 5.5m, but other widths are available on request.

Access to the compound can be controlled by various means. This includes integrated locks and keys, padlocks and mechanical key pads. Electronic access systems are also available, and these can either be 'standalone' or integrated with the site's existing door access control system.

Features & Benefits

- Elegant apex roof
- Modular construction
- Can be any height
- Ideal for our high capacity Josta 2-tier racks
- All shelters can be custom built to any size
- Embedded into a reinforced concrete base
- Galvanised Mild Steel framework
- Can be powder coated in any standard RAL colour
- High strength security glass roof
- Panels can be mesh or timber

Josta Berlin Shelter & Compound

Cladding

Both the shelter and the compound can be finished in a high security mesh that keeps the very open and light feeling but increases the security and protection of the bikes, alternatively they can clad in responsible sourced and slow grown hardened timber.

BREEAM and the Code for Sustainable Homes

As with all our shelters and compounds they can be used to help demonstrate compliance with BREEAM and achieve a high BREEAM rating when used in an appropriate situation. [MORE INFO.](#)

This cycle shelter can be used to help contribute towards gaining your 2 ENE8 Cycle Storage Credits when used in an appropriate situation, under the Code for Sustainable Homes. [MORE INFO.](#)

All our shelters and compounds come with a 5 year manufactures warranty.

About Cycle-Works

Cycling is our passion. We believe that cycling is good for people, good for society and good for the environment. This belief underpins everything we do. We believe that the provision of quality facilities will increase the use and acceptance of the bicycle.

All our employees and associates cycle regularly in diverse disciplines such as commuting, touring and long distance audax rides. We are active in both local and national cycle campaigning.
