The Cycle Storage Specialists

Service Station: one unit, many options

Overview

Our Service Station is a well designed maintenance station that features a bike pump and essential tool kit. The station can be easily modified to accept a canopy, lightening, logo space or an electric charging point for electric vehicles.

The Service Station has been designed to provide a vital service for cyclists, enabling them to repair bikes with minor mechanical problems before continuing their onward journey.

The strong industrial construction and durable galvanised and powder coated steel finish make the Service Station ideally suited for public spaces, bike stations and the work place. Its base plate allows fixing onto most hard, flat and level surfaces, while the pump's dual Presta/Schraeder valve fits all bikes.

Features & Benefits

- Provides a useful facility for cyclists
- Galvanised & powder coated steel, most RAL colours available
- Strong industrial design
- Different positions to support the bike or supports 2 bikes simultaneously
- Dual Presta/Schraeder valve
- Surface mounted with baseplate
- Integrated tool kit with Stainless steel cables
- Surfaced fixed
- Can include canopy, lightening, logo space, or EV charging modules.
