

Josta BikeStore²

Dimensions in mm

Length 2050
Width 850
Height 2600

Lockers under a shelter (shelter at extra cost).

Standard version.

Overview

The Josta **BikeStore²** locker combines the space-saving qualities of the Josta 2-tier rack with the advantages of an individual bicycle locker. Each user has their own lockable compartment, which allows them to store their bicycle and valuable accessories in a dry, secure environment.

As two bikes are parked directly on top of each other, this system increases the number of bicycles parked by up to 50%, or reduces the size of the area needed.

There is minimal lifting of the bicycle, as the top rack comes down for loading and unloading. A special patented gripping mechanism ensures that the bike cannot roll back and injure the user. This product can be customised by choosing different side panels, for example mesh or corrugated sheet steel. A bike logo side panel is also available if required.

Capacity

2 bicycles per unit, one at the top, one at the bottom.

Material/finish

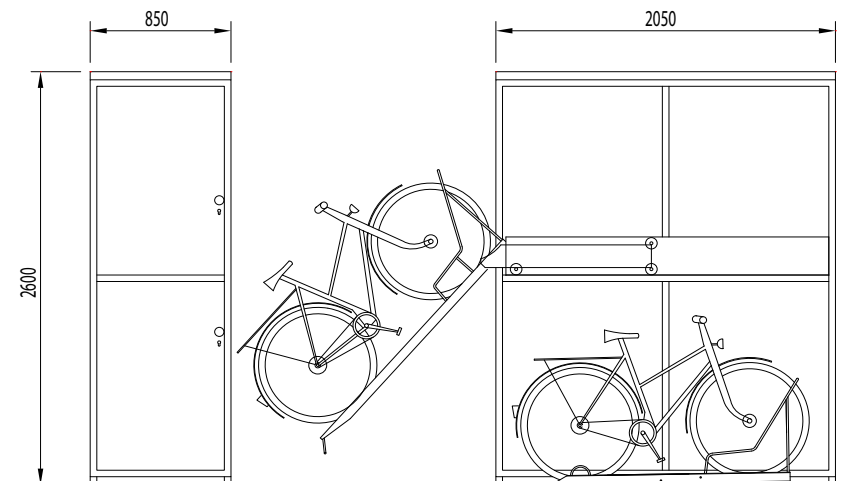

The lockers are made of galvanised mild steel.

Powder coating is available as an optional extra.

A bike logo side panel is also available if required.

Available with mesh or sheet side panels.

Locking mechanism: Integrated locks and keys.

The Cycle Storage Specialists

Josta BikeStore²

Standard Version.

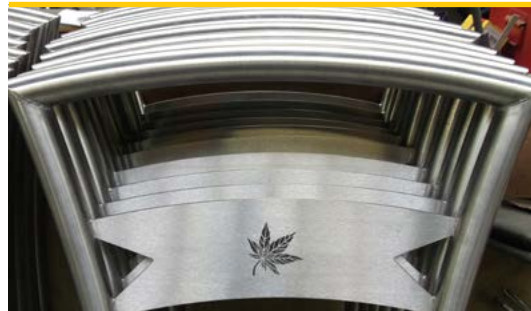

Customised lockers with oversized numbers.

About Cycle-Works

Cycling is our passion. We believe that cycling is good for people, good for society and good for the environment. This belief underpins everything we do. We believe that the provision of quality facilities will increase the use and acceptance of the bicycle.

All our employees and associates cycle regularly in diverse disciplines such as commuting, touring and long distance audax rides. We are active in both local and national cycle campaigning.
