The Cycle Storage Specialists

Bike Corrals, Velo-Planters & Velo-Parklets

RECLAIMING THE STREETS

Cities around the world are replacing car parking with attractive street furniture, such as bike parking, planters, trees and benches.

Bike Corrals

A bike corral is simply where car parking is removed and replaced with bike parking.

A corral can take many forms from simple bike stands to large custom made structures to match a particular area.

Velo-Planter is a modern way to create bike parking in an urban environment, by adding cycle parking to a planter.

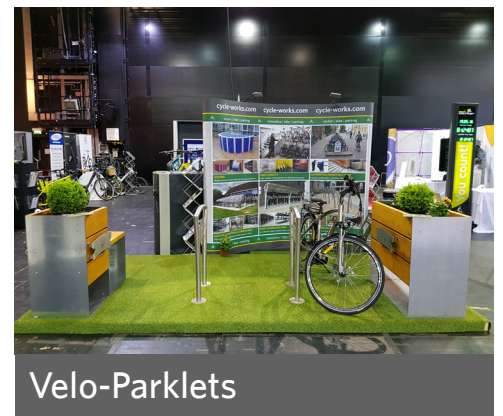

Velo-Planters

The Cycle-Works Velo-Planter incorporates a laser cut stainless steel locking point with a modern and attractive hard wood and steel planter.

A Velo-Parklet simply combines a Velo-Planter and a bike corral.

The can be arranged in any layout and customised for a particular site.

Velo-Parklets

Cycle-Works first installed a bike corral for Cambridge city council in 2005 and we now have a range of innovative products for this market.
