

## The Essex Rack

### Overview

The Essex cycle rack is a modern cycle parking system that offers high density and ease of use. The front wheel of the bike is protected from malicious damage by its surrounding framework.

The front wheel of the bike can be easily secured through the framework and an integrated eye loop at the rear of the rack.

The frame has been designed to accommodate tyre widths up to 55mm.

### Features & Benefits

- Securely holds the bike upright
- Incorporates a convenient locking point
- Hi-low-hi-low formation
- Each bike has its own space
- No damaged paintwork
- Quick and easy to install
- Units can be different sizes
- Easy to relocate, no groundworks
