

Ribble Shelter

Overview

The canopy systems of the Ribble series offer enormous versatility and functionality. Thanks to their hot-dip galvanized steel structures, they are not only designed for high durability, but also for demanding working environments.

The flat roof is made of weatherproof corrugated iron with an integrated rain drain, which leads the rainwater through a frame construction. With the help of water channels, this is derived close to ground level. The design of the supporting posts and the choice of the optional side elements, such as, for example, corrugated sheet metal walls, can be adapted to the respective requirements.

The Ribble range is available in many different combinations to suit your site. It can be easily clad in a wide range of materials including corrugated metal, glass, wood, mesh and PETg UV2. It is also able to be fitted with either swing or sliding gates to provide greater security.

Features & Benefits

- Modern modular design.
- Galvanised & powder coated steel construction.
- Clad in a wide range of materials.
- Capacity: Rows can be as long as required.
- Ideal for our high capacity 2-tier racks.
- Available with either a single double sided access.
- Doors can be added for extra security.
- Integrated drainage.

About Cycle-Works

Cycling is our passion. We believe that cycling is good for people, good for society and good for the environment. This belief underpins everything we do. We believe that the provision of quality facilities will increase the use and acceptance of the bicycle.

All our employees and associates cycle regularly in diverse disciplines such as commuting, touring and long distance audax rides. We are active in both local and national cycle campaigning.

Our Products

- Individual bicycle lockers
